Over the course of his life Alexander von Bernus published over twenty volumes of poetry, he wrote novellas, shadowplays, theatre plays, mystery plays, prose texts and an important work in the fields of alchemy and natural science: »Alchymie und Heilkunst« (»Alchemy and the Art of Healing«).

Every year since 1933 many of the world's leading intellectuals have met on Lake Maggiore to discuss the latest developments in philosophy, history, art and science and, in particular, to explore the mystical and symbolic in religion. The Eranos Meetings - named after the Greek word for a banquet where the guests bring the food - constitute one of the most important gatherings of scholars in the twentieth century. The book presents a set of portraits of some of the century's most influential thinkers, all participants at Eranos: Carl Jung, Erich Neumann, Mircea Eliade, Martin Buber, Walter Otto, Paul Tillich, Gershom Scholem, Herbert Read, Joseph Campbell, Erwin Schrodinger, Karl Kereyni, D.T. Suzuki, and Adolph Portmann. The volume presents a critical appraisal of the views of these men, how the exchange of ideas encouraged by Eranos influenced each, and examines the attraction of these esotericists towards authoritarian politics.

Der Katalog erschliesst Handschriften und Drucke alchemischen Inhalts aus dem 16. bis 20. Jahrhundert, die der deutsche Dichteralchemist Alexander von Bernus (1880-1965) gesammelt hat. Er verzeichnet rund 600 Druckschriften und enthält eine Beschreibung handschriftlicher Alchemica, ferner macht er mit ausgewählten Zeugnissen der frühneuzeitlichen Alchemica picta-Tradition bekannt und informiert über Entstehung, Eigenarten und Funktion der Alchemicasammlung Bernus. Der Band ergänzt die wenigen bibliographischen Hilfsmittel zur älteren Alchemieliteraturund gewahrt Aufschlüsse über Grundzüge der frühneuzeitlichen "Alchemica technica" "Alchemica transmutatoria metallorum", "Alchemica medica" sowie "Alchemicanystica"; schliesslich gibt er auch Einblicke in die fachliterarische Rüstkammer eines deutschen Arkanpharmazeuten des 20. Jahrhunderts.

A comprehensive alchemical guide to plant extractions and their health benefits • Shows how spagyric methods "open" medicinal plants completely to release powerful healing properties • Provides a history and philosophy of spagyrics that reveal why Western medicine fails to recognize the full benefit to health offered by plants • Connects spagyrics to classical alchemical, hermetic, and ayurvedic traditions The practice of spagyrics is the application of ancient alchemical working methods to the preparation of tinctures, essences, and other products from medicinal plants. While ordinary tinctures and infusions use only a part of the great curative potential of plants, spagyric methods "open" medicinal plants completely to reveal their more powerful healing properties. Drawing on the rich imagery and symbolism of ancient source materials, Manfred M. Junius describes these methods in great detail, showing readers how to prepare plant remedies alchemically for their own use as well as imparting a knowledge of the ideological world in which alchemistic and hermetic thought flowered. Spagyrics includes the Plant Magistry of Paracelsus and the Life Elixir recipe of Andreas Libavius among its historic techniques as well as a wealth of scientific information that demonstrates the greater efficacy of alchemical methods of plant essence extraction. This classic source text preserves the nearly forgotten but highly valuable methods of this true hermetic art for preparing natural remedies.

Using the ancient art of spagyrics for treatment of today's health problems • Contains detailed indications for using alchemical preparations therapeutically • Shows how the essences work holistically to heal the mind, body, and spirit with the energetic qualities of the plant • Provides effective therapy for a wide range of physical and mental disorders Spagyrics is a branch of medicinal alchemy that enhances the healing properties already existing in plants. Developed by Paracelus, the magus and alchemist of the early 16th century, spagyrics is a holistic therapy that promotes healing at all levels of the human being—body, soul, and spirit. Spagyric essences harness the dynamic life force in plants that triggers recovery from the energetic imbalance of illness. The harmonizing and balancing qualities of spagyric essences differ from other plant remedies and aromatherapy oils because they not only include the plant's energetic information but also incorporate the salt of the plant, from which all toxic matter has been purged. The preparation of this alchemical medicine makes it possible to capture the full therapeutic spectrum of plants, including the cosmic energies they have absorbed. Alchemical Medicine for the 21st Century contains detailed indications for using these alchemical preparations to treat both physical and mental disorders. The author shows, for example, that the tincture made from dandelion is especially potent on liver-related ailments and also raises the spirit and frees the patient from anger and bitterness. The immune system is also boosted by this essence, providing tonic effects for allergy sufferers. The author, a homeopath since 2000, also shows how these spagyric essences can be potentized homeopathically.

Primitive man's discovery of the ability to change matter from one state to another brought about a profound change in spiritual behavior. In The Forge and the Crucible, Mircea Eliade follows the ritualistic adventures of these ancient societies, adventures rooted in the people's awareness of an awesome new power. The new edition of The Forge and the Crucible contains an updated appendix, in which Eliade lists works on Chinese alchemy published in the past few years. He also discusses the importance of alchemy in Newton's scientific evolution.

Acorns delineates the future of humanity as a reunification of intellect with the Deep Self. Having chosen to focus upon ego (established securely by the time of Christ), much more beta brain wave development will destroy our species and others, which process has already begun. We create our own realities through beliefs, intents and desires and we were in and out of probabilities constantly. Feelings follow beliefs, not the other way around.
