Chapters (bookstore) - Wikipedia

A chapter book is a story book intended for intermediate readers, generally age 7-10. Unlike picture books for younger readers, a chapter book tells the story primarily through prose, rather than pictures. Unlike books for older readers, chapter books contain plentiful illustrations. The name refers to the fact that the stories are usually divided into short chapters, which provide children with opportunities to stop and resume reading if their attention spans are not long enough to finish ...

Who Wrote the Book of Psalms? Due to the frequent designation "A Psalm of David," many Bible scholars and translations hold to the belief that David is the author of most of the Psalms. If the Hebrew phrasing present in these superscriptions refers to authorship, then we can easily identify several additional contributors, including Solomon, Asaph, and Moses.

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Effective science teaching requires creativity, imagination, and

innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. *Science Teaching Reconsidered* provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

This book investigates whether and to what extent foreign language textbooks can contribute to promoting adolescent pupils' acquisition of intercultural communicative competence. It gives a full scientific account of a research project carried out amongst Flemish learners of German. The focus of the research was on the relationships between the culture teaching approaches adopted in textbooks and the pupils' learning of culture. Although the sub-title refers to a particular group of pupils learning a particular language, the study has more general bearing and constitutes a substantial contribution to the literature, and in particular empirical research, on the development of intercultural competence in and through foreign language education. The composition of the volume reflects the

affective, cognitive and contact dimensions of the culture learning process. It also gives space to the theoretical platform on which the research was built, and to the research methodology adopted.

Chapter 1 sets out to contextualise and define the research topic. It clarifies the study's position within the field of culture-and-language learning-and-teaching theory, practice and research. It also situates the investigation into the specific context of teaching and learning foreign languages-and-cultures in Flanders. In chapter 2 the theoretical framework informing the study is developed. Chapter 3 provides an overview of the techniques of data collection and analysis employed, of the kinds of data collected, and of the chronology of data collection. Chapters 4, 5 and 6 provide an interpretative description and analysis of the investigation's key concepts. Chapters 4 and 5 focus on the pupils' culture learning

processes and analyse relationships between attitude, contact and perception data. In chapter 6 the culture teaching approaches adopted in the investigated textbook series are described and evaluated with regard to their potential for promoting the pupils' learning of culture. Chapter 7, finally, provides a summary overview of the study's main findings and presents the main conclusions that can be drawn from the evidence presented in earlier chapters. It estimates the value of the study's research methodology and theoretical framework. It also reflects on how the research findings can find application and implementation.
