the Year One of the world's leading economists of inequality, Branko Milanovic presents a bold new account of the dynamics that drive inequality on a global scale.

Global Inequality: A New Approach
for the Age of ...

Adopting a more dynamic approach, Milanovic believes that inequality flows in cycles, continuously moving up or down as a result of the interaction of economic, demographic and political forces. GDP growth, technological progress and lobbying by powerful interest groups boost inequality, whereas wars, diseases and redistributive policies push it down.

GLOBAL INEQUALITY - resistir
I fear people won't read it. That's
because *Global Inequality: A New
Approach for the Age of
Globalization* attempts a tricky
thing. First, it looks hard at
economic inequality, which is a
subject that already appalls most
people, or just skates over their
heads. Second, it places the
subject on an international level.

research, he explains the benign and malign forces that make inequality rise and fall within and among nations.

Global Inequality : A New
Approach for the Age of ...

Global inequality, that is, income inequality among the citizens of the world, can be formally considered as the sum of all national inequalities plus the sum of all gaps in mean incomes among countries. The first component deals with inequality in incomes between rich and poor Americans, rich and poor Mexicans, and so on.
