university from 1880 to 1980. He pays particular attention to the connections between the changing forms and demands of American business and the cultivation of a university-trained middle class. He contends that by imbuing its staff and students with seemingly opposed ideas—of self-development on the one hand and of an economic system existing prior to and inviolate of their own activity on the other—the university has created a deeply conflicted middle class. Newfield views management as neither inherently good nor bad, but rather as a challenge to and tool for negotiating modern

life. In Ivy and Industry he integrates business and managerial philosophies from Taylorism through Tom Peters's "culture of excellence" with the speeches and writings of leading university administrators and federal and state education and science policies. He discusses the financial dependence on industry and government that was established in the university's early years and the equal influence of liberal arts traditions on faculty and administrators. He describes the arrival of a managerial ethos on campus well before World War II, showing how managerial strategies shaped even fields seemingly

disruption that has continuously changed the way we live, the way we work and the way we interact. The coming Augmented Age, however, promises a level of disruption, behavioural shifts and changes that are unparalleled. While consumers today are camping outside of an Apple store waiting to be one of the first to score a new Apple Watch or iPhone, the next generation of wearables will be able to predict if we're likely to have a heart attack and recommend a course of action. next decade because us humans are too risky. Following on from the Industrial or machine age, the space age and the digital age, the Augmented Age will be based on four key disruptive themes—Artificial Intelligence, Experience Design, Smart Infrastructure, and HealthTech. Historically the previous ‘ages’ brought significant disruption and changes, but on a net basis jobs were created, wealth was enhanced, and the health and security of society improved. What will the Augmented Age bring? Will robots take our jobs, and AI’s subsume us as inferior intelligences, or will this usher in a new age of abundance?
