This book is the product of a unique collaboration between Mainland Chinese scholars and scholars from the civil, common, and mixed jurisdiction legal traditions. It begins by placing the current Chinese contract law (CCL) in the context of an evolutionary process accelerated during China's transition to a market economy. It is structured around the

Core areas of contract law, anticipatory repudiation (common law) and defense of security (German law); and remedies and damages, with a focus on the availability of specific performance in Chinese law. The book also offers a useful comparison between the CCL and the UNIDROIT Principles of International Commercial Contracts, as well as the Convention on Contracts for the International Sale of Goods. The analysis in the book is undertaken at two levels - practical application of the CCL and scholarly commentary.

This is the first comprehensive work to capture the rise of moral damages (non-pecuniary loss) in European contract law through a historical and

Comparative analysis. Unique features of this study include the first classification scheme of the systems into liberal, moderate and conservative regimes, a taxonomy of non-pecuniary loss drawn from a European-wide jurisprudence, and a comprehensive bibliography of the subject. Written by a leading academic on comparative law, Palmer's precise and practical insights on Europe's leading cases will be of great interest to academic researchers and practitioners alike.

Recognised that damages for civil wrongs can be assessed by reference to a defendant (wrongdoer)'s gain rather than a claimant's loss. The circumstances in which such gain-based damages might be available were left for development incrementally. This book considers the nature of gain-based damages and explains when they have historically been available and why, and provides a framework for appreciating the operation of such damages awards. The first part of the book justifies the existence of these damages, which focus upon a defendant wrongdoer's gain made as a result of a civil wrong, explaining the nature and need for such a remedy and the scope of civil wrongs. The core thesis of the book is that two different forms of such gain-based

Damages exist: the first is concerned with restitution of a defendant's gains wrongfully transferred from a claimant; the second is concerned only with stripping profits from the defendant's hands. Once these two gain-based damages awards are separated they can be shown to be based upon different rationales and the basis for their availability can be easily understood. The second part of the book considers and applies this approach, demonstrating its operation throughout the cases of civil wrongs. The operation of the two forms of gain-based damages is demonstrated in cases in the area of tort (chapter 4), contract (chapter 5), equitable wrongs (chapter 6) and intellectual property wrongs (chapter 7). It is shown that these gain-based damages awards have long been

available in these areas and their operation has conformed to clear principle. The difficulty that has obscured the principle is the nomenclature which has hidden the true gain-based nature of many of these damages awards.
