Grade mixture combines two or more materials that retain their own properties. A solution forms when a material dissolves in a liquid (solvent) and cannot be retrieved with a filter.

Science Learning Objectives:

(1) Students will be able to explain that mixtures are a combination of two or more materials that retain their own properties.

5th Grade Science Mixtures and Solutions

Like a mixture, solutions can be separated into its original components.

However, unlike mixtures, solutions can be separated by evaporation. For example:
