To anyone left or right who wants to learn, think and act on the issues of our time, this book is for you. This book is a collection of discussions on immigration policy and other aspects of the "National Question"-whether the U.S. can continue as a nation-state, the political expression of a particular people.

Lately, the debate over various public policies, such as immigration reform and tax policy, has heated up in the United States. This dissertation seeks to explore the different impacts that some of the policy changes have on different groups of people. In doing so, I am able to help better inform policymakers of the possible economic outcomes of future reforms. The first chapter examines the labor market impacts of two state-level immigration policies designed to reduce the presence of undocumented immigrants: E-Verify and "Show Me Your Papers" (SMYP). Using a difference-in-difference strategy, I examine the separate and combined effects of these laws on the employment and wages of likely unauthorized, working-age men and women and the groups of low-skill American workers with whom they are most likely to compete for jobs. I also look at how these laws impact state-level economic outcomes, including industry-specific GDP. I find that immigration reform reduces employment and hourly wages among undocumented men. Immigration reform also results in large, negative impacts on state GDP, especially in industries that rely more heavily on undocumented workers. The second chapter examines the questions of whether consumers respond differently to taxes of different salience levels and if there is heterogeneity in consumer tax salience across income groups and other categorical groups such as age and education groups. I find evidence supporting tax salience theory in the market for alcohol. Additionally, I find evidence of heterogeneity in tax salience effects across different education levels. In particular, more educated consumers are more responsive to changes in sales taxes. The third chapter focuses on the impacts of immigration reform on the children of undocumented immigrants. By comparing siblings in a difference-in-difference approach, I show that DACA, a policy that reduces legal barriers for young undocumented immigrants, increases the educational attainment of potentially eligible youth. Meanwhile, policies such as Alabama HB 56, which increase barriers for undocumented immigrants, reduce the enrollment rates and increase dropout rates for the children of undocumented immigrants.

Few issues on the American political agenda are more complex or divisive than immigration. There is no shortage of problems with current policies and practices, from the difficulties and delays that confront many legal immigrants to the large number of illegal immigrants living in the country. Moreover, few issues touch as many

areas of U.S. domestic life and foreign policy. Immigration is a matter of homeland security and international competitiveness, as well as a deeply human issue central to the lives of millions of individuals and families. It cuts to the heart of questions of citizenship and American identity and plays a large role in shaping both America's reality and its image in the world. Immigration's emergence as a foreign policy issue coincides with the increasing reach of globalization. Not only must countries today compete to attract and retain talented people from around the world, but the view of the United States as a place of unparalleled openness and opportunity is also crucial to the maintenance of American leadership. There is a consensus that current policy is not serving the United States well on any of these fronts. Yet agreement on reform has proved elusive. The goal of the Independent Task Force on U.S. Immigration Policy was to examine this complex issue and craft a nuanced strategy for reforming immigration policies and practices.

Among the topics discussed in this collection of papers are the likely effects and hidden costs of employer sanctions under the Immigration Reform Act, the effects of amnesty, the history of guest worker programs, and how the different sectors of the labor market will be affected.
