Carol Tavis and Carole Wade once again set a new standard with this exciting alternative to traditional treatment of psychology. Psychology in Perspective, 3/e, responds to the American Association for the Advancement of Science's Project 2061, which calls upon all scientists to teach for depth of understanding rather than breadth of coverage. The authors have reorganized the traditional material according to the five major perspectives in the field

and offer an unbiased presentation of each perspective's strengths, limitations, and misuses. The text emphasizes the importance of understanding all five approaches in order to grasp the "big picture" of human experience. Explains and studies human behavior from the biological, learning, cognitive, sociocultural, and psychodynamic perspectives. For individuals interested in an alternative approach to psychology.

Written by a team of sociologists, this text introduces readers to social psychology by focusing on the contributions of sociology to the field of social psychology. The authors believe sociology provides a unique and indispensable vision of the social-psychological world in the theoretical perspectives that sociologists employ when studying human interactions and in the methodological techniques they utilize. Within the pedagogically rich chapters, topics are examined from the perspectives of symbolic interactionism, social structure and personality, and group processes.

The only comprehensive introductory psychology book that defines, models, and practices critical thinking in every chapter. When "man is the measure of all things," woman is forever trying to measure up. In this enlightening book, Carol Tavris unmaskes the widespread but invisible custom -- pervasive in the social sciences, medicine, law, and history -- of treating men as the normal standard, women as abnormal. Tavris expands our vision of normalcy by illuminating the similarities between women and men and showing that the real differences lie not in gender, but in power, resources, and life experiences. Winner of the American Association for Applied and Preventive Psychology's Distinguished Media Contribution Award

This edition integrates critical thinking, gender, age and culture into the study of psychology, drawing upon recent research and featuring two new chapters on evolutionary psychology and socio-cultural psychology.
